**Weather Update (National Weather Service)****Impacts**

- Light, terrain-driven winds are expected the next several days across the state, with locally breezy conditions in some areas, including but not limited to, the Delta breeze continuing, gusty onshore winds in the Antelope Valley, and gusty Sundowners of **25 to 40 mph in southwest Santa Barbara County developing again late Friday**.
- Wildfire smoke will remain across portions of northern and central California, bringing reduced visibility and air quality at times.
- Increasing temperatures return late week as high pressure builds over the state.

In some mountain locations and the Antelope Valley, west-southwest winds 10-20 mph with gusts 20-30 mph possible in the afternoon and evening.
Precipitation: Dry.	Precipitation: Dry.

Outlook for *Saturday through Thursday:*

Generally lighter winds are expected through the weekend, but locally breezy seasonal winds and elevated fire weather concerns are still expected. Sundowner winds of 25 to 40 mph are expected to continue through Sunday for southwestern Santa Barbara County.

Building high pressure across California will increase temperatures into the weekend. Temperatures will peak 10 to 15 degrees above normal for northern California Sunday and Monday and about 5 degrees above normal across southern California. Drier weather is expected statewide through Saturday, with monsoonal moisture returning to southern California as early as Sunday. The chance of isolated showers and thunderstorms may reach as far west as the LA Mountains and as far north as I-80 across the northern Sierras by Tuesday thanks to the added mid-level moisture and a passing weather system over northern California. Significant precipitation is not expected at this time except for potentially southeastern California.

CA-ESF 10: Hazardous Materials

Air Quality Index Map (airnow.gov) – California Environmental Protection Agency (Cal EPA) as of September 2, 2021, at 0600 Hours:

- CARB continues to support affected air districts and air quality agencies. A total of 33 portable air monitors are currently deployed (a new monitor was deployed yesterday in the community of Tahoma, CA, in El Dorado county) throughout the state to support local air quality agencies and is visiting their equipment storage caches in Redding, Mariposa, Ukiah, Santa Barbara and Fresno to manage inventories and resupply monitors and supplies. CARB will continue to develop plans and schedule air-monitoring deployments as needs and resources are identified. CARB along with affected air districts, USEPA and US Forest Service continue to hold daily meteorology and air monitoring coordination calls to predict emissions and plume movement, discuss air quality forecasts, review active and pending requests for monitoring support and provide operational updates on the air quality monitoring response.
- Based on yesterday's PM2.5 Air Quality Index (AQI) many communities in the following Northern California counties experienced air quality in the unhealthy to very unhealthy category: Lassen, Plumas, Sierra, Nevada, Placer, El Dorado, Amador, Alpine, Calaveras, Tuolumne, Mono and Siskiyou. Today's forecast predicts [similar](#) air quality in many locations with Placer, El Dorado, Alpine, Amador, Calaveras, Tuolumne and Mono counties expected to continue to have AQI in the very unhealthy category. Parts of [Trinity](#), [Siskiyou](#) and [Modoc](#) can expect [worsening](#) air quality today with AQI predicted to be in the [unhealthy](#) AQI category.
- The Sacramento Valley, Bay Area, Southern California, and foothill and mountain communities in the southern Sierra Nevada mountains are expected to receive [similar](#) air quality today as yesterday, with AQI predicted to be in the moderate to unhealthy for sensitive groups
